## Background

In accordance with the Government's guidance on Sustainability Appraisal (SA) it is necessary to take account of other relevant policies, plans, programmes and sustainability objectives when conducting a SA, as these may influence the options to be considered when preparing a DPD (ODPM Nov 2005).

A review of other relevant documents in relation to the SA and emerging DPDs will:

- Identify external social, environmental and economic objectives that should be taken into account in the Sustainability Appraisal of each DPD;
- Identify other external factors, including sustainability issues that might influence the preparation of each DPD and SPD;
- Determine whether other policies, plans and programmes might give rise to cumulative effects when combined with the relevant DPD that is subject to a SA.

Consequently it will be possible to determine whether local planning objectives are in accordance with national sustainability objectives and how any inconsistencies and constraints can be addressed.

The SEA Directive requires that assessment reports (such as the Sustainability Appraisal):

- Provide information on the plans relationship with other plans and programmes; and
- Demonstrate that the relevant environmental protection objectives established at international, European or national level has been taken into account during the preparation of the planning document.

Table 1 below sets out a list of key plans and programmes which have influenced the preparation of the of the Gosport Borough Local Plan 2011-2029 (Publication Version) and the Sustainability Appraisal. In addition to this, the Background Papers to support the draft Local Plan also uses an extensive range of assessments and studies which have also been used to inform the preparation of the draft policies however they do not need to be referred to as they do not constitute key plans and programmes for the purposes of preparing Annex A. (For ease of reference, web links to the documents listed in Table 1 have been included.)
