

LOCAL LIST OF HERITAGE ASSETS IN GOSPORT BOROUGH

The Local List of Heritage Assets is linked to Policy LP13 of the adopted Gosport Borough Local Plan 2011-2029.

It contains two types of locally important heritage assets:

- Part 1: Locally Listed Buildings; and
- Part 2: Parks and Gardens of Historic Interest.

This document sets out the currently known assets for both these categories as well as the criteria used to assess their significance.

The list will be updated where new evidence is available for buildings and parks that demonstrate that they meet the various criteria for designation as a historic asset. Other types of locally important historical assets could be included on the list during the Plan period. Such designations will be based on advice contained in the latest English Heritage guidance for local heritage listing¹. All additional assets will be formally added to the list once approved by the relevant Council Board.

Locally important archaeological sites which form the other main type of locally important heritage asset are not included on the Borough Council's list instead details are found on Hampshire County Council's Archaeology and Historic Building Record (AHBR)².

Part 1: Locally Listed Buildings

Criteria

The locally listed buildings are considered to be of historic architectural or townscape value located outside Conservation Areas which contribute to the character of the Borough. One primary criterion and a number of subsidiary criteria are used to determine inclusion on the List.

Primary Criterion

- **The Age and Condition of the Building.**

Age of Building	Condition
Post 1950	Complete and unaltered and of significant landmark value
1914–1950	Substantially complete and unaltered
1840–1914	Only affected by reversible minor alterations

² <http://www3.hants.gov.uk/landscape-and-heritage/historic-environment/historic-buildings-register.htm>

1700–1840	All buildings where the style and form is clearly identifiable and there is the potential to restore the building and for it to make a positive contribution to its setting.
Pre–1700	All buildings retaining more than 25% evidence of structural remains.
Pre–1600	All surviving structures

Subsidiary Criteria

In addition to the primary criterion at least one of the following criteria would also need to be met to ensure inclusion on the List. Two criteria would need to be met for buildings post dating 1914.

- **Historical Association**

A building's significance may relate to its association with a famous person or event, (i.e. nationally known personalities who had direct association with a building, association with a nationally important event, or lived there for any length of time), or very well known local personalities with a long association. Buildings may also have been constructed as part of a notable historic event. For example, specialist military buildings associated with a nationally important period.

- **Part of the Historic Socio-Economic Development of an Area**

Buildings which form an important part of the historic development of an area and which are of group or individual landscape value. This could also include buildings that reflect important aspects of the former social, economic or civic activity of an area (For example, town halls, chapels, workhouses, pubs and industrial buildings relating to important historic local industries).

- **Architectural Importance**

Good examples of the local vernacular; built by a noted local/national architect/engineer/builder; examples of local town planning; rare example or pioneering example of a building type.

- **Townscape significance**

Individual and/or group value. Well known local landmarks.

- **Buildings in the noted publications on historic building in Hampshire**

Such as Pevsner and Lloyd, or Hampshire Treasures

Part 2 Parks and Gardens of Local Historic Interest

Criteria

A list of parks and gardens of historic interest is contained on the Hampshire Register of Historic Parks and Gardens based on research carried out by Hampshire County Council and the Hampshire Gardens Trust. The parks and gardens of most significance in the Borough are drawn from this source.

Dating from the medieval period to the present day, Hampshire's historic parks, gardens and other designed landscapes include:

- ancient remains of medieval deer parks
- earthworks as evidence of former parks and gardens
- the landscapes of country houses, including parks, pleasure grounds, kitchen gardens and ornamental woodland
- the designed gardens and grounds of houses
- plant collections
- public parks and open spaces
- cemeteries and churchyards
- designed landscapes forming the grounds of institutional or business premises.

Parks and gardens are of historic interest when they:

- illustrate an aspect of the history of parks, gardens and landscape design, for instance they represent the work of a particular designer or were created in a particular period or style
- contain historic features that are of archaeological, architectural, artistic, horticultural, cultural or social interest
- have significant historic associations, for example with a particular person or event
- are part of a group of buildings or land of historic interest or significance and provide the setting for important buildings
- retain features that represent a rich tapestry of historical changes and landscape development.

The list will from time to time be reviewed to assess whether further parks or gardens within the Borough merit inclusion.
