| Developable area | 0.25 ha | Based on whole site |
| Local area density | High | |
| Development density | 360 dph | |
| Capacity for dwellings | 50 | Based on further work in 2019/20. |

| Concluding comments | The Gosport waterfront and Town Centre SPD identifies this site as a preferred option for development as it has been demonstrated that the Town Centre has a large surplus of parking spaces and that this needs to be rearranged. The SPD background paper provides further information in this regard. Prior to the release of any car park the Council require a car parking strategy to be produced to confirm that each site, in combination, are the most appropriate for release. For the purposes of the SHLAA this site has been considered appropriate to be included as suitable, available and achievable. The lorry park is not used anywhere near to capacity. There is potential to redevelop the site for housing if an alternative lorry park in an area of the borough suitable for HGV's can be found. It will be necessary to consider the potential cumulative impacts of releasing the site; this is being assessed as part of the car parking strategy. The site could be redeveloped for residential development as a key gateway site for the Town Centre. There is the potential to partially |

| Concluding actions | Potential for site release subject to further car parking strategy work and an alternative location for lorries. |
