Subject: Waterfront

It has come to my attention that there is a plan to build a high rise block of flats on the site which is now the bus station. This is total madness as it will block the sun from the Falkland Gardens and the surrounding area. I also suspect that these flats will be priced beyond the reach of local people. The council should consult the people of Gosport before any regeneration of the area. More than enough of the waterfront has has been destroyed already and promises have not been fulfilled by GBC.
